Introduction

Have you received a form requesting information from the ABS? Do you have any questions or need help? Visit the [Providers Information](#).

The economic activity survey provides employment, financial information and performance measures at a broad industry level (Australian and New Zealand Standard Industrial Classification (ANZSIC) sub-division) on an annual basis.

The rotating program of service industries collections includes specific industry surveys each year. The main focus of these surveys is the size and structure of service industries (at the ANZSIC class and sub ANZSIC class level) in terms of detailed financial information and employment. As well, some activity data is available for most surveys.

Information on the specific collections undertaken by the Service Industries statistics program can be found on the following pages:

Wholesale Trade Industry - The wholesale trade industry includes all businesses mainly engaged in wholesale trade. The term wholesale trade is used in the broad sense to include the resale (as agents or

principals) of new or used goods to business or to institutional (including Government) users. Businesses mainly engaged in wholesale trade are wholesale merchants who take title to the goods they sell; separate sales branches (not being retail stores) operated by manufacturing enterprises; commission agents; import and export agents and purchasing agents; petroleum products and distributors; and cooperatives and marketing boards engaged in marketing farm products. Businesses mainly engaged in reselling their own goods by auction are included. For more information refer to the [Wholesale Trade Industry](#) page.

Retail Trade Industry - The retail trade industry includes all businesses mainly engaged in the resale of new or used goods to final consumers for personal or household consumption or in selected repair activities such as repair of household equipment or motor vehicles. Businesses engaged in retail trade include department stores or other shops, motor vehicle retailers and service outlets, mail order houses, hawkers, door-to-door sellers, milk vendors, vending machine operators and consumer cooperatives. Businesses mainly selling goods on a commission basis to final consumers for personal or household consumption are included. For more information refer to the [Retail Trade Industry](#) page.

Accommodation, Cafes and Restaurants Industry - The accommodation, cafes and restaurants industry covers businesses mainly engaged in providing hospitality services in the form of accommodation, meals and drinks. Industries surveyed include: accommodation, clubs, pubs, taverns and bars, and cafes and restaurants. For more information refer to the [Accommodation, Cafes and Restaurants Industry](#) page.

Transport and Storage Industry - The transport and storage industry covers all units mainly engaged in providing passenger or freight transport by road, rail, water or air; terminal facilities for passengers or freight; services related to transport such as car parking, stevedoring, harbouring services, navigation services, airport operation or space port operation; booking, travel, freight forwarding, crating or customs agency services; and storage facilities. Also included are units mainly engaged in operating pipelines for the transport of oil, gas etc., on a contract or fee basis. For more information refer to the [Transport and Storage Industry](#) page.

Property and Business Services Industry - The property and business services industry includes all businesses engaged in renting and leasing assets as businesses engaged in providing a wide variety of business services. For more information refer to the [Property and Business Services Industry](#) page.

Health and Community Services Industry - The health and community services industry includes all businesses and organisations mainly engaged in providing health and community services. For more

information refer to the [Health and Community Services Industry](#) page.

Cultural and Recreational Services Industry - The cultural and recreational services industry includes businesses and organisations mainly engaged in providing cultural and recreational facilities and services. For more information refer to the [Cultural and Recreational Services Industry](#) page.

Personal and Other Services Industry - The personal and other services industry includes businesses which are mainly engaged in providing personal services. For more information refer to the [Personal and Other Services Industry](#) page.

For information on other related products and services visit the [Product Information](#) page.

Background information on the processes involved in conducting a statistical survey can be found on the [Collection Processes](#) page.

[Accommodation Industry, Australia](#) (cat. no. 8695.0)

PURPOSE

The objective of the survey is to measure the size and structure of the accommodation industry in Australia on a comparable basis. The survey also provides valuable input into the compilation of tourism satellite accounts.

SCOPE

The scope of the survey is all non-government businesses on the ABS Business Register classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 5710 Accommodation; consisting of hotels, motels and similar units mainly engaged in providing short term accommodation.

DATA DETAIL

The publication contains the following tables at the Australia level:

- sources of income
- items of expenditure

- characteristics of employment
- business size
- performance measures
- estimates of profitability of establishments classified by type of activity (hotel/motel/caravan park), size of establishment (number of rooms/sites), star grading and income

Key aggregates by State and Territory include:

- employment
- wages and salaries
- gross income
- estimates of profitability of establishments classified by type of activity (hotel/motel/caravan park)

Additional data not included in the publication may be available on request.

[Clubs, Pubs, Taverns and Bars, Australia](#) (cat. no. 8687.0)

PURPOSE

In recent times there has been considerable interest in extending the ABS Service Industries Surveys program to produce more comprehensive and more regular data on the Australian hospitality industries. The Clubs, Pubs, Taverns and Bars Survey is part of this thrust.

SCOPE

The scope of the survey is all employing businesses classified to the following two classes of the Australian and New Zealand Standard Industrial Classification (ANZSIC):

- Pubs, Taverns and Bars (ANZSIC 5720); consisting of businesses (except licensed clubs) mainly engaged in selling alcoholic beverages for consumption on the premises.
- Clubs (hospitality) (ANZSIC 5740); consisting of organisations mainly providing hospitality services to members.

DATA DETAIL

Data is dissected by businesses with gambling facilities and businesses without gambling facilities. For the purposes of the survey businesses with gambling facilities are those providing either poker/gaming machines, TAB facilities and/or keno services to patrons.

Estimates are produced on number of businesses, business size, employment, sources of income, items of expenditure, and performance ratios. State and Territory comparisons are made by employment, wages and salaries, gambling income and total income.

[Cafes and Restaurants Industry, Australia](#) (cat. no. 8655.0)

PURPOSE

In recent times there has been considerable interest in extending the ABS Service Industries Surveys program to produce more comprehensive and more regular data on the Australian hospitality industries. The Cafes and Restaurants Survey is part of this thrust.

SCOPE

The scope of the survey is all employing businesses recorded on the ABS business register and classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 5730 Cafes and Restaurants. This class comprises businesses mainly engaged in operating cafes and restaurants for consumption of meals on the premises and businesses mainly engaged in catering services. It excludes takeaway food retailing businesses.

DATA DETAIL

The publication contains data items tailored to the industry, similar to the data items used in the 1991-92 in order to produce comparable estimates. These data items include:

- income breakdown by various sources e.g. takings from meals, takeaway food, liquor, etc.
- detailed breakdown of expenditure items
- detailed breakdown of employment data; full-time/part-time, males/females as well as main occupation
- type of establishment eg BYO, licensed cafe/restaurant, catering service
- performance ratios
- State and Territory comparisons are made by employment, wages and salaries and total income

[Contents](#) >> [Transport and Storage Industry](#) >> Travel Agency Services

[Travel Agency Services Industry, Australia](#) (cat. no. 8653.0)

PURPOSE

The collection aim was to measure the financial performance of the Travel Agency Services industry. All licensed travel agents (with income from travel agency activities of \$30,000 or more, as per the Travel Compensation Fund and the Northern Territory Travel Agent Licensing Commission) were surveyed, along with relevant State Tourist Bureau and similar organisations and other significant organisations involved in the industry.

Results from the survey are used by ABS National Accounts as well as other public and private sector organisations to measure the contribution of the industry to the economy, to monitor the overall performance of the industry and to provide benchmarks for future studies of the industry.

SCOPE

The survey included employing businesses classified to Class 6641 Travel Agency Services of the Australian and New Zealand Standard Industrial Classification (ANZSIC). This class comprises businesses mainly engaged in the provision of travel agency services such as transport, and/or accommodation booking, tour

wholesaling or retailing and tourist bureau services. Businesses, such as domestic and international airlines, that carry out travel agency activities, but are mainly engaged in providing other services were excluded from the survey.

The survey was conducted with the assistance of the Travel Compensation Fund (TCF) which provided statistical data to the ABS from information collected from travel agency businesses included in the 1996-1997 TCF Annual Financial Review. In addition, information was collected directly by the ABS from other travel agency businesses not covered by the TCF.

All licensed travel agents covered by the regulations of the TCF and the Northern Territory Government (which is not included in the TCF jurisdiction) were included in the survey. In addition a sample of businesses on the ABS Business Register classified to ANZSIC class 6641 were included.

DATA DETAIL

Estimates on number of businesses, sources of income including gross ticket sales by travel product, items of expenditure, employment characteristics and performance ratios were produced. State and Territory comparisons are made by employment, wages and salaries and total income.

[Real Estate Services Industry, Australia](#) (cat. no. 8663.0)

PURPOSE

To provide key measures on the performance of the Real Estate services industry. To identify the nature and structure of the industry/activity in terms of employment, income, costs and its contribution to the Australian economy.

SCOPE

The scope of the collection was:

- all employing businesses on the ABS Business Register mainly engaged in valuing, purchasing, selling (by private auction or treaty), managing or renting real estate for others, as defined by Class 7720 of the Australian and New Zealand Standard Industrial Classification (ANZSIC).
- the Valuer's General office(s) in each state

DATA DETAIL

Published data reflects a range of standard outputs including: business employment details, income and

expense dissected by major component and financial performance ratios together with a set of activity data outputs. The publication contains summary employment, income, and expenses tables covering ANZSIC Class 7720.

The tables in the publication include:

- sources of income
- items of expenditure
- characteristics of employment
- main occupation of persons employed
- selected statistics by employment size groupings
- selected performance ratios

The tables contain data at the Australia level with one state table showing:

- number of businesses
- employment
- wages and salaries
- total income

GEOGRAPHIC COVERAGE

Australia

[About this Release](#)

[Contents](#)

[Contents](#) >> [Property and Business Services Industry](#) >> Motor Vehicle Hire

[Motor Vehicle Hire Industry, Australia](#) (cat. no. 8652.0)

PURPOSE

The objective of the motor vehicle hire survey was to provide fundamental baseline data necessary to understand the nature of the motor vehicle hiring industry, to enable comparison with other industries and to provide a benchmark for measuring change over time.

SCOPE

The collection was a census of all businesses classified to Class 7741 of the Australian and New Zealand Standard Industrial Classification (ANZSIC), apart from fleet management businesses, on the ABS Business Register. This class consists of units mainly engaged in leasing, hiring or renting motor vehicles from their own stocks, without drivers. The scope of the collection excluded businesses which did not have employees.

DATA DETAIL

The publication contains details of employment, wages and salaries, components of income and expenses,

assets and liabilities, and details of motor vehicle rentals such as number of motor vehicles in rental fleet. Measures of productivity and profitability including industry gross product, operating profit before tax, net worth and a range of ratios are given.

GEOGRAPHIC COVERAGE

Australia
New South Wales
Victoria
Queensland
South Australia
Western Australia
Tasmania
Northern Territory
ACT

FREQUENCY OF DATA AVAILABILITY

The survey was conducted in respect of the 1991-1992 financial year. It is expected that this industry will be surveyed again in respect of the 2002-2003 financial year.

[Hire Industries, Australia 1999-2000](#) (cat. no. 8567.0)

PURPOSE

The objective of the plant hiring and leasing industry survey is to provide the fundamental base line data necessary to understand the nature and structure of the industry in terms of income, expenditure and employment and to provide a benchmark for measuring change over time.

SCOPE

The scope of the survey is all employing businesses recorded on the ABS Business Register classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 7743 Plant hiring or leasing.

DATA DETAIL

Published data reflects a range of standard outputs including:

- sources of income
- items of expenditure

- characteristics of employment
- hire assets
- selected performance ratios

The tables contain data at the Australia level with one state table showing:

- number of businesses and locations
- employment
- wages and salaries
- total income

[About this Release](#)

[Contents](#)

[Contents](#) >> [Property and Business Services Industry](#) >> [Legal Services](#)

[Legal Services Industry, Australia](#) (cat. no. 8667.0)

PURPOSE

To provide key measures on the performance of the Legal Services industry and to identify the nature and structure of the industry/activity in terms of employment, income, costs and its contribution to the Australian economy.

The Legal Services Industry survey is planned to be undertaken three yearly. The collection is a survey of practices mainly engaged in providing legal services.

SCOPE

The scope of the collection was:

- all businesses whose predominant activity is providing legal services, as defined by Class 7841 of the Australian and New Zealand Standard Industrial Classification (ANZSIC)
- Legal Aid Commissions in each state and territory
- the Federal Solicitor General and Crown Solicitor's in each state and territory

The Australian Legal Directory provided the collection frame (as it has done for the last two Legal Services Surveys). The ABS Business Register has not been used as the frame because of the predominance of service companies, and therefore non-employed businesses in the industry. The unit for which statistics were reported was the practice (combination of business and service companies).

DATA DETAIL

The publication contains summary employment, income, and expenses tables covering ANZSIC Class 7841.

The tables in the publication include:

- sources of income (by solicitors' practices and barristers practices)
- legal services income by type of client solicitors' practices
- items of expenditure (by solicitors' practices and barristers practices)
- characteristics of employment (by solicitors' practices and barristers practices)
- main occupation of persons employed solicitors' practices
- pro bono work (by solicitors' practices and barristers practices)
- selected performance ratios (by solicitors' practices and barristers practices)
- income and expenditure items by legal aid authorities and community legal centres
- legal services by legal aid authorities and community legal centres

The tables contain data at the Australia level with one state table showing:

- number of practices
- number of solicitors and barristers
- total employment
- wages and salaries
- total income

GEOGRAPHIC COVERAGE

Australia
New South Wales
Victoria
Queensland
South Australia
Western Australia
Tasmania
Northern Territory
ACT

FREQUENCY OF DATA AVAILABILITY

The survey of the Legal Services Industry for the 1998-1999 reference year is the fourth collection conducted by the ABS for this sector. The three previous being in 1995-1996, 1992-1993, and 1987-1988.

Note: In the three previous surveys Legal Services has been conducted alongside a Survey of Accounting Services and the output of these two surveys has been produced in a single publication. The 1998-1999 Legal Services Survey is the first time the survey has been conducted without a corresponding Accounting Services Survey, and this resulted in a specific Legal Services publication.

[Cleaning Services Industry, Australia](#) (cat. no. 8672.0)

PURPOSE

The changing structure of the cleaning services industry in Australia has meant that users require more regular statistics. In particular, the recent introduction of the one stop shop approach to property management services has seen some change in the structure of this, and other related industries. This survey assists in measuring the affect this change has had on the size and structure of the industry.

SCOPE

The scope of the collection was all businesses mainly engaged in providing window, building, telephone cleaning or similar cleaning services (except carpet cleaning or shampooing services, steam cleaning, or sand blasting of building exteriors), as defined by Class 7866 of the Australian and New Zealand Standard Industrial Classification (ANZSIC).

DATA DETAIL

The survey publication contains summary employment, income, and expenses tables covering ANZSIC Class 7866.

The tables include:

- sources of income
- items of expenditure
- characteristics of employment
- main occupation of persons employed
- selected statistics by employment size groupings
- selected performance ratios

The tables contain data at the Australia level with one state table showing:

[About this Release](#)

[Contents](#)

[Contents](#) >> [Property and Business Services Industry](#) >> Employment Placement and Contract Staff Services

[Employment Services, Australia](#) (cat. no. 8558.0)

PURPOSE

To provide key measures on the performance of the Employment Placement and Contract Staff Services industries and to identify the nature and structure of the industries/activities in terms of employment, income, costs and their contribution to the Australian economy.

SCOPE

The scope of the collection was:

- all employing businesses mainly engaged in personnel search, selection, referral and placement in connection with employment in any field. The services may be supplied to the potential employer or the prospective employee and may involve the formulation of job descriptions, the screening and testing of applicants and the investigation of references, as defined by Class 7861 of the Australian and New Zealand Standard Industrial Classification (ANZSIC),
- all employing businesses mainly engaged in supplying their own employees to other businesses on a fee or contract basis as defined by Class 7862 of the Australian and New Zealand Standard Industrial Classification (ANZSIC). Assignments are mainly short term and performed under the supervision of staff

- of the client unit,
- all businesses with a Job Network contract not already included in the above categories, who are involved in job placement (defined by 7861 and 7862) activity,
- all Group Training Companies not already included in the above categories, who are involved in job placement (defined by 7861 and 7862) activity.

ANZSIC Class 7861 Employment Placement Services:

Primary Activities - Outplacement service, executive search service, employment office operation, employment agency operation.

Exclusions/References: Businesses mainly engaged in theatrical and motion picture casting are included in Class 9529 (Services to the Arts n.e.c.).

ANZSIC Class 7862 Contract Staff Services:

Primary Activities - Temporary labour hire

Exclusions/References: Businesses mainly engaged in providing the workforce on a long-term basis (including supervisory staff) for other units are classified according to the predominant activities of the client businesses.

The coverage source was the ABS Business Register and therefore the scope was defined by businesses on the Business Register classified to ANZSIC Classes 7861 and 7862. This was supplemented by both Group Training Companies and "Businesses with a Job Network contract" who are involved in job placement activity and who are not classified to 7861 and 7862.

DATA DETAIL

The publication contains the following tables at the national level together with summary data at the state level:

- sources of income
- items of expenditure
- characteristics of employment
- main activity of persons employed
- selected statistics by employment size groupings
- selected performance ratios
- some activity data such as number of placements

The tables contain data at the Australia level with one state table showing:

- number of businesses
- permanent placements
- employment
- wages and salaries
- total income

GEOGRAPHIC COVERAGE

Victoria
Queensland
South Australia
Western Australia
Tasmania
Northern Territory
ACT

FREQUENCY OF DATA AVAILABILITY

A survey of businesses involved in Employment Placement Services (ANZSIC Class 7861) and Contract Staff Services (ANZSIC Class 7862) was conducted in respect of 1998-1999. This was the first time that an economic survey specifically targeting these industries had been undertaken.

[About this Release](#)

[Contents](#)

[Contents](#) >> [Property and Business Services Industry](#) >> Business Events Venues

[Business Events Venues Industry, Australia](#) (cat. no. 8566.0)

PURPOSE

The business events industry operates venues to support conferences, seminars, workshops, colloquia, conventions, exhibitions, and other events (such as incentives and business lunches/dinners). Such events are designed to enhance the development of the industries and associations which host them and to provide a means of sharing knowledge and information.

Business events have significant economic impact in their own right and are sought after by private and government agencies in the cities or regions in which they are held. They generate significant economic activity which would not otherwise occur in the cities and regions in which they are held: these include direct inputs such as registration fees, accommodation, meals and beverages, transport, entertainment, shopping, and in the process employment is created.

In 1999 the Bureau of Tourism Research completed a study of the Australian meetings and exhibitions industry sector which suggested that basic statistics on the structure and operations of the events industry were not available. The BTR study provided some basis upon which to estimate the economic activity of the events venue industry, however it revealed significant gaps in the information available on the industry. This Business Events Venues Survey attempts to fill some of those gaps.

The survey collects data which will provide information on the types of events held, the financial operations of

the industry in terms of income and expenditure and the capacity and use of events venues. This will inform major stakeholders including industry associations (e.g. the Business Events Council of Australia, Meetings Industry Association of Australia, and Exhibition and Event Association of Australia) , other ABS statistical collection areas, government agencies and the business establishments operating in the industry. It will also provide information (such as comparative size of operations and profitability) to inform decisions made by business establishments who wish to enter the industry.

SCOPE

The scope of the collection includes all businesses operating in 2000-2001 within Australia which provided venue facilities and services in support of business events. Venues included within the scope of the collection must meet the following criteria:

- able to provide for venue facilities for 500 or more delegates or attendees
- in both plenary (whole of conference) and multi-location concurrent (ie "break-out") sessions
- whose main activity is business events (as opposed to social or entertainment)

For the purpose of the collection business events include those a commercial, financial, technology and scientific nature. (It excludes venues which have as their predominant events activity social and entertainment events).

The final collection frame was developed using information obtained from industry associations, from convention/conference bureaux in each State and Territory, and from published lists of venues marketed on the World Wide Web and in published directory services of telecommunications agencies (eg Yellow pages). The frame was developed with the assistance of the Business Events Council of Australia (BECA) which is the peak consultative body for the industry.

DATA DETAIL

Business establishments which provide facilities and services in support of business events (conferences, meetings, exhibitions).

Counts of the following:

- number of establishments providing venues and other facilities for business events
- employment
- capacity and usage including space (area) of venues, type and number of events held, number of delegates/attendees

Estimates of:

- income and expenses

- operating profit before tax, operating profit margin, industry value added
- selected operating ratios, eg:labour costs per employee, venue hire to total income, venue hire income per sq. metre, attendees per event

State summary data will be made available for selected key indicators (eg number of establishments, total space, number of events held, total income).

Data sets will be cross-classified by type of venue.

The following other key terms and concepts are applicable to this collection:

Types of events:

- Meetings, conferences and conventions: All off site gatherings, held in commercial venue space, which consist of more than 15 people. This would also involve congresses, seminars, workshops, symposiums, and associated gatherings that bring together people for a common purpose.
- Exhibitions - An event that brings together suppliers of products, equipment, and services in an environment where they can display their products and services.
- Other events - This includes weddings, graduations, parties etc.

Employment (Permanent, Casual, Casuals sourced from other businesses)

Source of Income

Expense items

Capacity and usage of facilities (including floor space, number of lettable rooms)

Number of events

Delegate/Attendee days (Total number of delegates/attendees attending x days attended)

GEOGRAPHIC COVERAGE

Australia

New South Wales

Victoria

Queensland

South Australia

Western Australia

Tasmania

Northern Territory

ACT

FREQUENCY OF DATA AVAILABILITY

The collection will be conducted once as a one-off survey, with no current intention to repeat it. The collection will be conducted by means of a mail-out questionnaire and after processing the results will be released in standard ABS products. The collection reference period is 2000-2001 and the release of final results is expected in June 2002.

[Film and Video Production and Distribution, Australia](#) (cat. no. 8679.0)

PURPOSE

The collection was undertaken in response to user's need for financial information about the film and video industry, to measure its size and structure on a regular basis, and its contribution to the Australian economy.

SCOPE

The collection was a survey of businesses and organisations mainly engaged in the film and video production and distribution industries. The scope of the collection was based on the Australian and New Zealand Standard Industrial Classification (ANZSIC) classes:

- 9111 Film and Video Production; consisting of businesses/organisations mainly engaged in the production of motion pictures on film or video tape for theatre or television projection. This class also includes such services as casting, film editing and titling.
- 9112 Film and Video Distribution; consisting of businesses/organisations mainly engaged in leasing or wholesaling motion pictures on film or video tape to organisations for exhibition or sale. This class also includes agents mainly engaged in leasing and wholesaling films and videos to organisations.

DATA DETAIL

The publication contains the following tables at the Australia level:

- sources of income
- items of expenditure
- characteristics of employment
- selected statistics by employment size groupings
- selected performance ratios
- various activity data such as film and video and television production activity

The collection was undertaken to measure the size and structure of the sound recording studios industry.

SCOPE

The collection was a census of sound recording studios covering all employing businesses classified to Class 9251 Sound Recording Studios of the Australian and New Zealand Standard Industrial Classification (ANZSIC).

DATA DETAIL

The publication contains the following tables at the Australia level:

- sources of income
- items of expenditure
- characteristics of employment
- assets and liabilities

- selected performance ratios

GEOGRAPHIC COVERAGE

Australia
New South Wales
Victoria
Queensland
South Australia
Western Australia
Tasmania
Northern Territory
ACT

FREQUENCY OF DATA AVAILABILITY

The collection was last conducted in respect of 1996-1997.

[Contents](#)

[Contents](#) >> [Cultural and Recreational Services Industry](#) >> Lotteries

[Gambling Industries, Australia](#) (cat. no. 8684.0)

PURPOSE

The lottery survey was conducted as part of the gambling industry surveys. The changing structure of the gambling industries in Australia has meant that users require more regular statistics to measure gambling activity over time.

SCOPE

The collection included businesses classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 9321 Lotteries; consisting of businesses/organisations mainly engaged in operating lotteries or selling lottery tickets.

DATA DETAIL

The lotteries data is presented in two statistical views, namely an industry view and an activity view. The industry view contains estimates for businesses classified to ANZSIC class 9321 Lotteries. The activity view is

part of total gambling activity i.e. businesses undertaking gambling services regardless of their industry.

The publication contains the following tables at the Australia level by industry:

- sources of income
- items of expenditure
- characteristics of employment
- main occupation of persons employed
- selected statistics by employment size groupings
- selected performance ratios for the lotteries and casinos industries

Tables of activity data include:

- net and gross takings from gambling by type of gambling and location
- number of poker/gaming machines by industry of location and by state
- number of poker/gaming machines by industry of location and by state
- an income breakdown of the various types of gambling

GEOGRAPHIC COVERAGE

[Contents](#)

[Contents](#) >> [Cultural and Recreational Services Industry](#) >> Casinos

[Casinos, Australia](#) (cat. no. 8683.0)

PURPOSE

The main purpose of the Casino survey was to measure the size and structure of the casino industry in terms of employment and financial contribution for time comparisons.

SCOPE

The scope of the collection is all employing businesses whose predominant activity is casino services (i.e. classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) class 9322 Casinos).

Class 9322 includes businesses mainly engaged in providing a range of gambling services in addition to totalisator or gaming machine services, and other amusements, in a building to which the general public has access. Included are businesses providing food, liquor and accommodation services in addition to a full range of gambling services.

DATA DETAIL

The publication contains summary employment, income, and expenses tables covering ANZSIC Class 9322.

The tables in the publication are released at the Australia level only:

- sources of income
- items of expenditure
- characteristics of employment
- main occupation of persons employed
- concentration statistics of the top four casinos
- selected performance ratios
- some activity data such as number of gaming/poker machines and number of gaming tables

GEOGRAPHIC COVERAGE

Australia

FREQUENCY OF DATA AVAILABILITY

From 1994-1995 to 2000-2001 the collection of statistics for the Casinos industry has been undertaken annually.

[Recreation Services, Australia](#) (cat. no. 8688.0)

PURPOSE

The Recreation collection was undertaken in response to need for financial information about the sport, recreation and gambling industries.

Seven sport, recreation and gambling industries and two hospitality industries (see scope below) were included in the one collection because of the degree to which their activities overlap eg sports businesses with gambling facilities.

SCOPE

The collection was a survey of employing businesses in the Australian and New Zealand Standard Industrial Classification (ANZSIC) class 9330 Other Recreational Services.

DATA DETAIL

The publication contains the following tables at the Australia level:

- sources of income (including a breakdown by source of funds including the three levels of government funding, admission takings, subscriptions/fees, sponsors and advertising)
- items of expenditure
- characteristics of employment (including a detailed breakdown of employment data (full-time /part-time, male/female)
- seasonal pattern of employment
- selected statistics by employment size groupings
- selected performance ratios

The tables contain data at the Australia level with one state table showing:

[About this Release](#)

[Contents](#)

[Contents](#) >> [Cultural and Recreational Services Industry](#) >> Amusement and Theme Parks

[Selected Amusement and Leisure Industries, Australia](#) (cat. no. 8688.0)

PURPOSE

The collection of amusement and theme park data was conducted as a census of businesses selected on the basis of pre-defined selection criteria (refer to scope of the collection) in order to measure the size and structure of the industry.

SCOPE

The scope of the census included amusement and theme parks which met the following criteria:

- business was primarily a tourist attraction and operated on a commercial basis;
- attendances greater than 500 000
- multiple rides

The scope of this census was therefore limited to selected amusement and theme parks and the criteria for the 1991-1992 survey was different to the criteria for the 2000-2001 survey.

DATA DETAIL

The statistical unit for which statistics were reported in the census was the amusement/theme park. Census participants were asked to report only those activities of the business that took place at the location of the nominated amusement/theme park.

The data include the number of attractions and theme parks surveyed, number of visitors by month, details of employment, components of income and expenses.

GEOGRAPHIC COVERAGE

Australia

FREQUENCY OF DATA AVAILABILITY

This collection is conducted on an irregular basis. It was conducted in respect of 1991-92 and 2000-2001 and the release of final results is expected in April 2002.

[About this Release](#)

[Contents](#)

[Contents](#) >> [Health and Community Services Industry](#) >> General Practices and Specialist Services

[Private Medical Practices, Australia](#) (cat. no. 8685.0)

PURPOSE

The primary purpose of the Private Medical Practice Survey was to provide the fundamental base line data necessary to understand the size and structure of general medical practices, specialist medical practices and pathology laboratory businesses in terms of income, expenses and employment.

Complementing this survey is some demographic information about general medical practitioners collected via the [Private Medical Practitioners Survey](#) (cat. no. 8689.0).

SCOPE

The scope of the 2001-2002 Private Medical Practices Survey was all private medical businesses primarily offering general medical services and specialist medical services. In terms of the Australian and New Zealand Standard Industrial Classification (ANZSIC), these businesses would be classified to class 8621- GENERAL PRACTICE MEDICAL SERVICES and 8622 - SPECIALIST MEDICAL SERVICES. Administrative service businesses providing dedicated services to these businesses were also included.

The scope also included pathology laboratory businesses who provided a pathology service in which human

tissue, human fluids or human body products are subjected to analysis for the purposes of prevention, diagnosis or treatment of disease in human beings and included any premises from which a service was conducted (this definition is based on the definition of a pathology service as specified in the Pathology Services Accreditation Act 1984: Act no. 10083/1984).

Government departments, hospitals, nursing homes, community health centres, universities and businesses predominantly providing veterinary pathology laboratory services were excluded from the scope of this survey.

DATA DETAIL

Published data for 2001-2002 reflects a range of standard outputs including:

- sources of income
- items of expenditure
- characteristics of employment
- selected statistics by practice size (for general medical practices and specialist medical practices only)

The tables for general medical practices and specialist medical practices contain data at the Australia level with one state table showing:

- medical practice locations (split by general practice medical services and specialist medical services)
- employment (split by general practice medical services and specialist medical services)
- wages and salaries (split by general practice medical services and specialist medical services)
- fee for service medical income (split by general practice medical services and specialist medical services)
- other income (split by general practice medical services and specialist medical services)
 - total income (split by general practice medical services and specialist medical services)

More detailed data are available on request by telephoning the contact shown on the [Client Contact](#) page.

The tables for pathology laboratory businesses contain data only at the Australia level.

Complementary data from the Private Medical Practitioners Survey includes data relating to the number of private medical practitioners, their basic demographics such as age and gender, type of medical specialisation, hours worked and number of consultations in an average working week.

GEOGRAPHIC COVERAGE

Australia

New South Wales (for general medical practices and specialist medical practices only)

Victoria (for general medical practices and specialist medical practices only)

Queensland (for general medical practices and specialist medical practices only)

South Australia (for general medical practices and specialist medical practices only)

Western Australia (for general medical practices and specialist medical practices only)

Tasmania (for general medical practices only)

Northern Territory (for general medical practices only)

ACT (for general medical practices only)

For specialist medical practices, data for Tasmania, Northern Territory and ACT are combined. For pathology laboratory businesses, data are available only at the Australia level.

FREQUENCY OF DATA AVAILABILITY

The surveys of private medical practices, pathology laboratory businesses and private medical practitioners were conducted for the first time in respect of the 1994-1995 financial year and again in respect of the 2001-2002 financial year.

[Dental Services, Australia](#) (cat. no. 8551.0)

PURPOSE

To provide key measures on the performance of the dental services industry. To identify the nature and structure of the industry/activity in terms of employment, income, costs and its contribution to the Australian economy.

SCOPE

The collection was two surveys of private sector practitioners and businesses involved in the provision of dental services.

The first survey was a sample of private practice dental practitioners. The sample was selected from the Medibank provider file in March 1998. The scope included dental practitioners working in private practice and excluded dental practitioners solely engaged in the public health system.

The businesses included in the second survey were identified from the responses to the first survey in which dental practitioners were asked to provide details about the dental businesses for which they work and any

administrative service companies/trusts providing support services to the dental businesses.

In terms of the Australian and New Zealand Standard Industrial Classification (ANZSIC), businesses whose main activity is the provision of dental services are classified to Class 8623 Dental Services.

DATA DETAIL

Published data reflects a range of standard outputs including:

- activities by type of business
- sources of income
- items of expenditure
- characteristics of employment
- selected statistics by practice size
- selected performance ratios
- activity data on general practitioners and specialists including age, male/female and general practitioners/specialists employment breakdown and number of consultations by general practitioners/specialists

The tables contain data at the Australia level with State tables showing:

- number of practices
- number of locations
- total employment
- employment breakdown by male/female and general practitioners/specialists
- wages and salaries
- total income

PURPOSE

To provide key measures on the performance of the Optometry and Optical Dispensing services industry. To identify the nature and structure of the industry/activity in terms of employment, income, costs and its contribution to the Australian economy.

SCOPE

The collection was two surveys of private sector optometrists and businesses involved in the provision of optometry and optical dispensing services.

The first survey was a sample of private practice optometrists. The sample was selected from the Medibank provider file in March 1998. The survey excluded optometrists solely engaged in the public health system.

The businesses included in the second survey were identified in two ways:

- as a result of responses to the first survey in which optometrists were asked to provide details about the optometry/optical dispensing businesses for which they work

- optical dispensing businesses listed on the ABS Business Register

In terms of the Australian and New Zealand Standard Industrial Classification (ANZSIC), businesses whose main activity is the provision of optometry/optical dispensing services are classified to Class 8632 Optometry and Optical Dispensing.

DATA DETAIL

Published data reflects a range of standard outputs including:

- sources of income
- items of expenditure
- characteristics of employment
- selected statistics by business size
- selected performance ratios
- activity data on optometrists including age, male/female employment breakdown and number of consultations

The tables contain data at the Australia level with State tables showing:

- number of businesses
- total employment
- employment breakdown by male/female for optometrists
- wages and salaries
- total income

PURPOSE

The objective of the survey is to provide the fundamental base line data necessary to understand the nature of the veterinary services industry and to provide a benchmark for measuring change over time.

SCOPE

The scope of the survey is all private veterinary service businesses on the ABS Business Register classified to the Australian and New Zealand Standard Industry Classification (ANZSIC) Class 8640 Veterinary Services. This class comprises businesses of registered veterinary practitioners and also includes businesses mainly engaged in operating animal hospitals.

DATA DETAIL

The tables in the publication include:

- income breakdown by source, including by broad type of treatment and sales of merchandise (eg drugs,

- pet foods, accessories)
- detailed breakdown of expenditure
- characteristics of employment
- location of establishment
- State data (practices, locations, employment, wages and salaries, total income)
- performance ratios

PURPOSE

The objective of the survey was to provide the fundamental base line data necessary to understand the nature and structure of the Nursing Homes industry in terms of income, expenditure and employment, to enable comparison with other industries and to provide a benchmark for measuring change over time.

SCOPE

The scope of the survey was all employing businesses and organisations classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 8613 Nursing Homes; consisting of businesses/organisations mainly engaged in providing nursing or convalescent home facilities (including the provision of nursing or medical care as a basic part of the service).

DATA DETAIL

Published data reflects a range of standard outputs including:

- sources of income
- items of expenditure
- characteristics of employment
- number of volunteers and hours worked
- selected statistics by organisation size

GEOGRAPHIC COVERAGE

Australia

State/Territory data is available.

FREQUENCY OF DATA AVAILABILITY

The Community Services Survey was conducted in respect of 1995-1996 and 1999-2000. In addition to the Nursing Homes industry, the collection covered the Child Care, Accommodation for the Aged and Other Residential and Non-residential Care services industries.

[Video Hire Industries, Australia](#) (cat. no. 8562.0)

PURPOSE

The objective of the survey was to provide the fundamental base line data necessary to understand the nature and structure of the Video Hire industry in terms of income, expenditure and employment, to enable comparison with other industries and to provide a benchmark for measuring change over time.

SCOPE

The scope of the survey is all businesses classified to the Australian and New Zealand Standard Industrial Classification (ANZSIC) Class 9511 Video Hire Outlets; consisting of employing businesses mainly engaged in hiring pre-recorded video cassettes to the general public for personal use.

DATA DETAIL

Published data reflects a range of standard outputs including:

- sources of income
- items of expenditure
- characteristics of employment
- selected performance ratios
- various activity data such as the number of rental transactions

The tables contain data at the Australia level with State tables showing:

- number of locations
- total employment
- wages and salaries
- total income

GEOGRAPHIC COVERAGE

Australia
New South Wales
Victoria
Queensland
South Australia
Western Australia
Tasmania
Northern Territory
ACT

FREQUENCY OF DATA AVAILABILITY

This survey has only been conducted once in respect of 1999-2000.
